Subject RE: West Lake OU2; Revised draft SOW

Thanks Dan. For your consideration, it might be more relevant to say "the minimum and maximum sloping requirements of 5% and 25%, respectively, need not be met in this case..."

Ward Herst, Managing Director

Subject: West Lake OU2; Revised draft SOW

All -

I have discussed the proposed changes with Ward. With respect to the first partial paragraph on pg. 3, I understand the concern with the way it was originally stated; however, I don't like the proposed change. I would like to address this by simply deleting that last sentence. The other proposed changes are OK with me.

"sustaining vegetative growth. The minimum sloping requirement of 5% need not be met in this case; however, the design shall include provisions for slope stability and optimize the need to promote runoff and minimize the potential for erosion. (delete last sentence)"

Thanks
